

# JMON

By A.J. Donovan

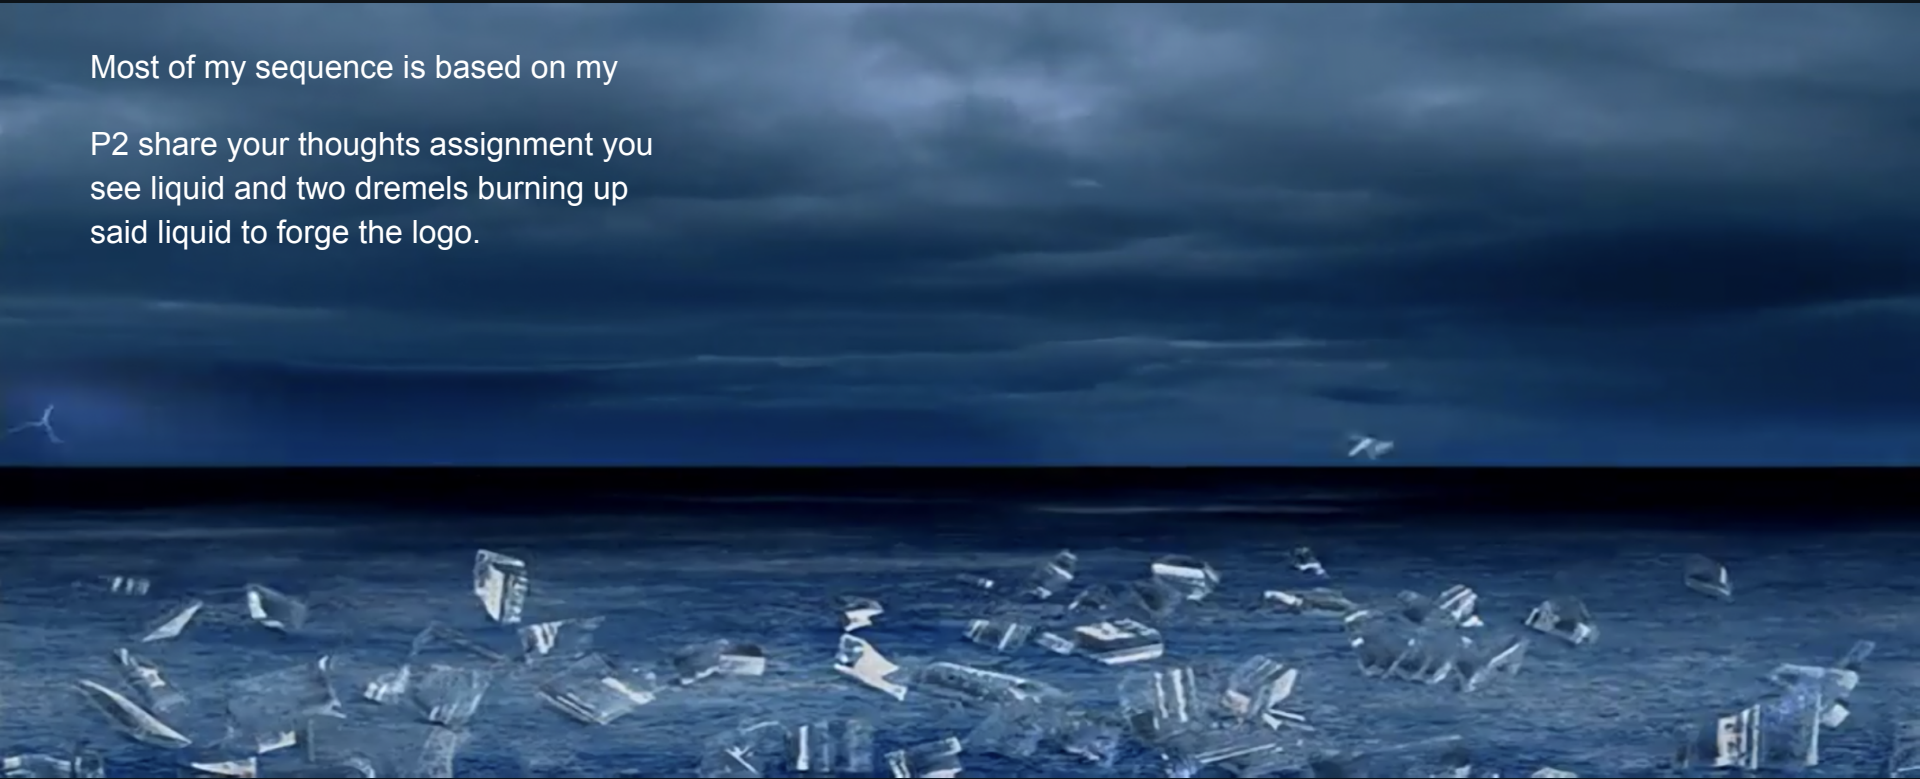

I plan to make a logo with  
animation similar to THX

Most of my sequence is based on my

P2 share your thoughts assignment you  
see liquid and two dremels burning up  
said liquid to forge the logo.

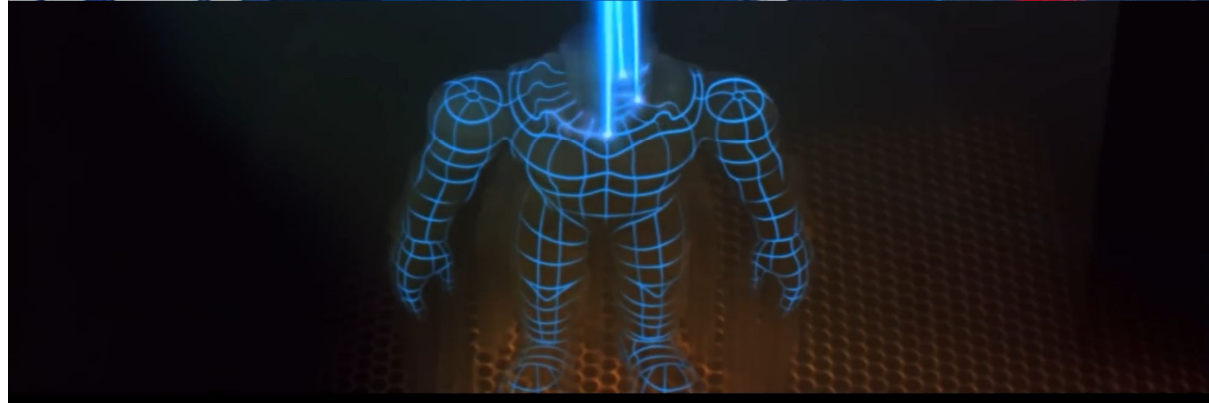

For my Font I will use San-Serif

# Shots

For the light switch I will use as an establishing shot, which will turn toward an upward shot to see the descending dremels. I switch to a medium shot to see the dremels shoot lasers at the liquid. For the claw I will use a down shot pov shot. For the title being formed I will use a panning truck shot

# Sfx

For the Sound Effects I will most likely use mechanical noise from this link
